

We are experienced business advisors providing the right advice to you.

An accountant should be far more than a historian, collecting and reporting on past performance. At Siepert & Co., LLP, we are trusted business advisors who have been providing our clients with outstanding accounting and tax services since 1949. We work closely with our clients to anticipate their needs and help guide their actions, providing significant value in the services we perform.

Your accountants should be your most trusted business advisors, so it's imperative to partner with ones you can trust.

At Siepert we develop a complete understanding of your goals and needs and can offer a full array of comprehensive business consulting services to help you meet them. We are experienced advisors who understand systems and technology that influence business operations.

Systems Consulting:

Analytical Review:

Siepert provides you with a comprehensive report analyzing your financial statements to help you derive more meaning from them. We provide ratios and trend analyses of the results of your operations and compare that information to the results of other companies of your size in the industry. This in-depth analysis can be invaluable to you in a competitive marketplace.

Accounting Procedures:

The professionals at Siepert can help you understand what accounting procedures are most appropriate for use in your business. We can then assist you in implementing policies and procedures to adopt the best practices for your company.

Internal Controls:

Internal controls protect your businesses from abuse and fraud; they ensure that the information we're receiving is accurate and timely, and that all regulatory requirements are being met. Siepert can assist you in developing sound practices for implementing controls over your operations.

Consulting, Cont.

Audit Services | **Consulting** | Financial Statements | Payroll Processing

We are experienced business advisors providing the right advice to you.

An accountant should be far more than a historian, collecting and reporting on past performance. We work closely with our clients to anticipate their needs and help guide their actions, providing significant value in the services we perform.

Software and Related Technology Consulting:

Accounting Software Consulting:

Siepert is well-versed on the accounting software packages that are available in the marketplace and can help you select the right software for your operations.

Remote Web Hosting Services:

Certain software packages are also available to be hosted remotely in a secure environment to enable you to access your information anytime, anywhere. You will never fear losing valuable information due to the loss of a server or your local hard drive. With remote web hosting, the information is backed up automatically for you and stored in server clusters that ensure convenient access and no down time.

QuickBooks™ Pro Advisors:

Siepert has a team of certified QuickBooks ProAdvisors who have expertise with QuickBooks software packages. They provide training as well as on-going support to better assist you in using the software.
